

IFSL Arbion Balanced Opportunities class I

Fund Factsheet (GBP)

As at 31st January 2025

Overview

INVESTMENT OBJECTIVE

To increase the value of your investment in excess of 5% a year, net of fees, over any 5 year period. There is no certainty the investment objective will be achieved. This is through a combination of capital growth (which is profit on investments held) and income (which is money paid out of investments such as dividends from shares and interest from bonds).

SUITABILITY

Investments are suitable for retail investors whose investment requirements are aligned with the objectives, policies and risk profile of the Fund.

ASSET ALLOCATION PROFILE

The Fund is actively managed, meaning Arbion Ltd (the "Investment Manager") decides which investments to buy and sell, and when. The Fund has exposure to a broad range of asset classes and investments across different industries and geographical regions, with a balance between key asset types of bonds and shares, but not all asset classes need be held at all times. This may include:

- Between 30% and 60% in bonds and cash.
- Between 20% and 60% in shares of companies.
- Up to 20% in alternative assets; such as, regulated funds employing a hedge fund type strategy and structured products (securities whose returns are linked to underlying assets or markets, such as shares, bonds, currencies, commodities or interest rates).
